CAREER

Years	Team / Programme	Discipline	Riders & marquee results
2025–26	Cannondale Factory Racing — HEAD MECHANIC	XCO/XCC	Neff (Olympic champion '21), Aldridge, Santos, Punchard, Martin. 2026: men's World Cup overall leader on my build; Aldridge's first elite WC win '25 (MSA XCO+XCC double)
2024	INEOS Grenadiers (exclusive programme)	XCO	Pauline Ferrand-Prévot — Paris 2024 Olympic GOLD; full-season run-up
2022–23	Cannondale Factory Racing	XCO	Mona Mitterwallner (Marathon Worlds GOLD '23), Avancini, Aldridge (U23 Worlds GOLD '23)
2019–21	British Cycling (Olympic programme)	XCO	Tom Pidcock — Tokyo 2020 Olympic GOLD (first-ever British MTB Olympic medal)
2019	Atherton Bikes / Atherton Racing — head mechanic	DH	3D titanium-printed frames developed to WC podium level; Johnset Jr Worlds silver
2016–18	Trek Factory Racing — head mechanic (DH)	DH	Rachel Atherton's perfect 2016: 8/8 — all 7 WC rounds + Worlds; Worlds golds '16 '18; Edwards Jr Worlds gold '18
2012–15	GT Factory Racing — head mechanic	DH	Gee Atherton — DH World Champion '14; Rachel — Worlds golds '13 '15
2011	Animal Commencal — head mechanic	DH	Atherton family programme
2005–11	Mojo Suspension — sole mechanic, race programme	DH	Ran the race programme single-handed from the 2007 Worlds (Fort William) to 2011; suspension specialist grounding. Former Polish junior-road national squad rider

Track record with women's programmes

Two of the most successful female riders in MTB history won on my builds: **Pauline Ferrand-Prévot** (Paris 2024 Olympic gold — I ran her exclusive programme at INEOS) and **Rachel Atherton** (the winningest female DH racer ever — I was her head mechanic for the only perfect season in World Cup history, 2016). Also: Mona Mitterwallner's Marathon Worlds gold ('23), Jolanda Neff race support (2025–26), Mille Johnset Jr Worlds silver ('19), and current hands-on development of an U23 women's talent running a consistent top-7 World Cup campaign in 2026.

WHAT I BRING AS HEAD MECHANIC

- **Race-winning preparation at the highest level** — current men's World Cup overall leader is on my bikes; two Olympic campaigns delivered under maximum pressure
- **Systems, not chaos** — I build the structure a programme runs on: per-venue setup databases, suspension telemetry analysis (BYB), tyre/pressure testing protocols with power data, race-day planning tools used daily by a factory team
- **Team leadership** — running a 3-mechanic crew across a 5-rider factory roster: assignments, race-day ops, truck & workshop, junior mechanic development
- **Product development** — Atherton Bikes 3D-Ti frame programme; prototype testing & sponsor product feedback (Fox, Schwalbe, Cannondale, SRAM/Shimano ecosystems)
- **Rider trust** — direct, calm, honest; riders at three teams have asked for me by name

RIDERS WORKED WITH

Olympic champions: Tom Pidcock, Pauline Ferrand-Prévot · **Legends:** Rachel Atherton, Gee Atherton · **Current roster:** Jolanda Neff, Charlie Aldridge, Luca Martin, Cole Punchard, Ana Santos · **Developed to Jr/U23 Worlds medals:** Edwards, Johnset, Aldridge, Punchard · **Also:** Mitterwallner, Avancini, Hatton

QUALIFICATIONS & PRACTICAL

- **Cytech certified** — professional mechanic accreditation
- Suspension specialist (Mojo/Fox background; founded Polished Racing suspension service)
- Full clean driving licence; truck & race-logistics experienced; EU-based (Poland), fluent English & Polish
- Available for 2027 season — currently completing final season as CFR head mechanic

The short story

Bielawa, Poland — textile town under the Owl Mountains; grandfather built radios at the Diora factory. I grew up on a smuggled ZX Spectrum, raced junior road for Poland, moved to the UK, and spent twenty years taking World Cup pit lanes apart the way I once took apart BASIC programs. I still build both: race bikes, and the planning & data tools my teams run on every race day.
